

Access Management Intenta 3D-Vision Sensors

COVID-19 | More security for staff and customers

Automated access and occupancy management

Due to the COVID-19 pandemic, new safety guidelines and restrictions in day-to-day business challenge stationary retailers. There is a need to know the exact number of people in the store in order to maintain the necessary safety distance between customers. Thus helping to reduce the risk of infection and to contain the spread of the virus.

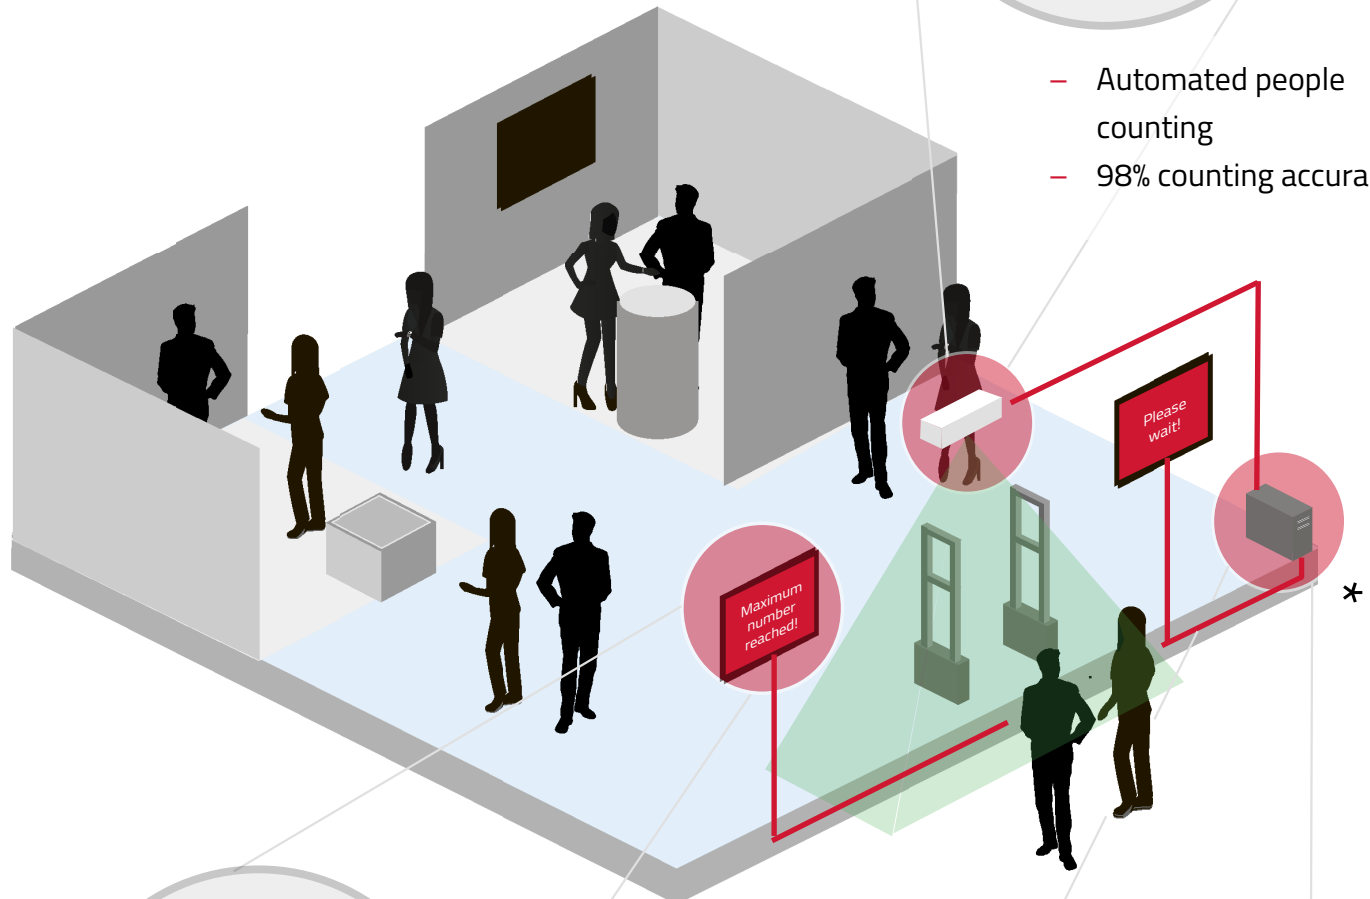

Real-time customer statistics!

Intenta would like to support you in this challenge with our **Intenta 3D-Vision Sensors!**

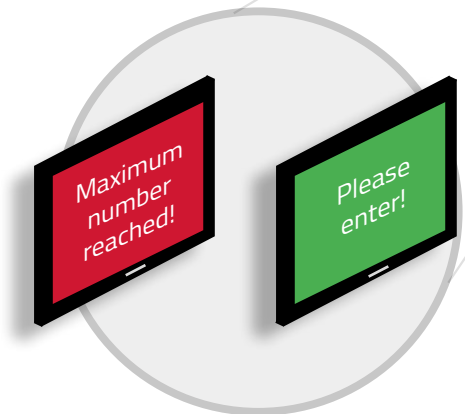

Your Benefits

- ✓ Compliance with current safety regulations
- ✓ Flexible limitation of customer numbers in store
- ✓ Increased customer acceptance
